Juan García Marín

Full Stack Developer with hands-on experience in complete web and mobile application development. Specialized in React, Angular, Next.js, Java Spring Boot, and tools such as Docker, PostgreSQL, Supabase, and MongoDB. Proactive, with strong problem-solving skills and team collaboration ability.

PROFESSIONAL EXPERIENCE

CGI INC. – LISBON, PORTUGAL

Software Developer (Internship) / Mar 2024 – Jun 2024

- **Internal project for managing job proposals:** standardization of the proposal workflow from creation to HR approval.
- **Backend:** Microservices architecture with Spring Boot; RESTful API design and use of Spring Data JPA for PostgreSQL persistence.
- **Frontend:** Development with Angular (modular components, services, RxJS for real-time data handling).
- **DevOps:** Containerization using Docker.
- **Methodology:** Weekly sprint work with SCRUM, coordination with HR team, and technical documentation in Confluence.
- **Achievements:** Delivered a fully functional MVP pending integration into CGI's intranet.
